Accomplishments since last status report:

There has been progress made on interacting with the running webcrawler, and presenting the data in a visually pleasing way. The test plan is much more robust, and there has been significant copy editing on the final report.

Obstacles encountered since last status report:

Risks facing the project:

We could have library problems dealing with SSL pages. This can be mitigated by research, and is not a huge issue as it's a relatively low priority story. We could have communications problems between the report viewer and the web crawler. This would be a huge issue. A backup plan might be to use python to generate JSON directly from pickled object from the webcrawler, or potentially generate oneshot reports directly in the webcrawler, those these options are both less flexible.

Objectives for the next week:

Make up for the missed meeting (that put us behind 20 hours). Finish up all of the Use Cases. Test functionality and prepare for final presentation.

Notes:

Thomas had family commitments which led to him being unavailable for the weekend. Meeting planned for Friday, but was canceled because of sickness and unforeseen conflicts.

SWE 3613 Timesheet

Project Name:	Forager - Group 4
Member:	Robin Mays
Week Ending:	20-Nov-2012

Team Member Work Summary			
Day:	Monday	Task(s) performed:	UI Touch-up Work for Sorting
Date:	11/19/2012	Result:	
Hours Worked:	1	Problems encountered:	
Day:	Tuesday	Task(s) performed:	
Date:	11/20/2012	Result:	
Hours Worked:	0	Problems encountered:	
Day:	Wednesday	Task(s) performed:	Documentation
Date:	11/14/2012	Result:	
Hours Worked:	1	Problems encountered:	
Day:	Thursday	Task(s) performed:	
Date:	11/15/2012	Result:	
Hours Worked:	0	Problems encountered:	
Day:	Friday	Task(s) performed:	
Date:	11/16/2012	Result:	
Hours Worked:	0	Problems encountered:	
Day:	Saturday	Task(s) performed:	
Date:	11/17/2012	Result:	
Hours Worked:	0	Problems encountered:	
Day:	Sunday	Task(s) performed:	
Date:	11/18/2012	Result:	
Hours Worked:	0	Problems encountered:
